# HX-PA SERIES

 UniMeasure

## RATIOMETRIC VOLTAGE OUTPUT

Utilizing a precision potentiometer, the UniMeasure HX-PA series position transducer provides basic absolute positioning with an analog output. With a steady state input voltage, and with the potentiometer connected as a voltage divider, the ratiometric output voltage is directly proportional to wire rope extension. The unit will function with any input voltage up to 25 volts maximum. To obtain best output linearity, the input voltage should be well regulated.

# HX-PB SERIES

## BRIDGE CIRCUIT VOLTAGE OUTPUT

The UniMeasure HX-PB series transducer includes the sensing potentiometer in a bridge circuit with adjustable zero and span controls. The completely passive circuit gives a maximum output voltage at maximum span setting of approximately 18% of the input voltage. The span adjustment allows for easy interface to a bridge amplifier. With zero position adjustable to anywhere within the total range of the transducer, voltage output is positive when extending the cable from the selected zero position and is negative when retracting from zero.

## Technische Daten

# HX-P420 SERIES

 UniMeasure

## 4 to 20 mA OUTPUT

The HX-P420 position transducer provides a 4 to 20 mA output signal with a potentiometric sensor. The HX-P420 is particularly advantageous in electrically noisy environments. Since the transmitter is loop powered, an assembled system consists of a power supply, current monitor, and transmitter all connected in series. Zero and span adjustments allow setting the 4 mA position within the first 30% of total travel and setting the 20 mA position within 80% to 100% of total travel. The HX-P420 may be powered with a supply voltage in the range of 12 to 35 VDC subject to the total loop resistance.

## 0 to 5 VDC or 0 to 10 VDC OUTPUT

The HX-P510 position transducer provides a 0 to 5 or 0 to 10 VDC output utilizing a potentiometric sensor. Pins B and C of the connector are both COMMON and are connected together internally at the transducer enabling a three or four wire connection. With adjustable zero and span, zero position may be set within the first 30% of the total measurement range. The span allows maximum output voltage to be adjusted to 5 VDC or 10 VDC for displacements between 80% and 100% of total range. The HX-P510 may be powered by an unregulated supply voltage in the range of 11 to 35 VDC.

# HX-P1010 SERIES

 UniMeasure

## $\pm 10\text{VDC}$ OUTPUT (Adjustable to $\pm 5\text{VDC}$ )

The UniMeasure HX-P1010 series position transducer provides an output voltage from -10 VDC to +10 VDC with adjustability to -5 VDC to +5 VDC. The zero position may be set within 10% to 90% of the total range of the transducer. The output voltage will be positive when the cable is extending from the zero position and negative when retracting from the zero position. The span may be adjusted to the maximum output voltage within 50% to 100% of the longest possible travel from the zero position, whether positive or negative.

A dual voltage input (+15 VDC, -15 VDC and COMMON) is required but optional single excitation voltages of +5, +12, +15, or +24 VDC are available. With optional single input voltages, the power supply ground is isolated from the output common.

## Technische Daten

# HX-EP SERIES

UniMeasure

## DIGITAL OUTPUT

### SPECIFICATIONS

Utilizing an incremental encoder as the sensor, the UniMeasure HX-EP series position transducer provides a two channel square wave current sinking output signal in quadrature. The standard output is a single-ended TTL compatible square wave with  $2\text{K}\Omega$  pullup resistors provided internally. The resolution values shown in the specifications table indicate resolution for times 1 counting mode where a count is registered for one up transition in channel A. With interface electronics capable of times 2 or times 4 counting mode, a true resolutinal increase of 2 or 4 may be obtained. For example, the HX-EP-50 has a resolution of approximately .004" per count in times 1 counting mode whereas the resolution is approximately .001" per count in times 4 counting mode.

The actual resolution of a HX-EP transducer differs from unit to unit because of tolerances associated with the wire rope diameter and the capstan upon which the wire rope winds. The nylon jacketed wire rope option will have the effect of slightly reducing the resolution. Linearity and repeatability remain independent of resolution. In applications where the output count is interpreted as a percentage of total travel, resolutinal differences from unit to unit are not critical. However, in applications where the digital output is to be interfaced to a digital display to give an output in engineering units, the calibration constant supplied with the transducer may be used to calculate a suitable scale multiplier to produce the correct engineering units.

Alternative outputs shown in the "Optional Outputs" table below are available to facilitate interfacing to a variety of different types of equipment.

Optional Ingress Protection ..... NEMA 6 (IP-68)

TABLE 2 ----- RESOLUTION

MODEL	RANGE (inch) (mm)	RESOLUTION <sup>1</sup> (counts/inch) (counts/mm)	TOLERANCE <sup>1</sup> ON RESOLUTION
HX-EP-10	10 250	500.0 19.69	$\pm 0.30\%$
HX-EP-25	25 640	250.0 9.84	$\pm 0.20\%$
HX-EP-50	50 1250	250.0 9.84	$\pm 0.20\%$
HX-EP-60	60 1.5 m	205.8 8.10	$\pm 0.20\%$
HX-EP-80	80 2.0 m	155.2 6.11	$\pm 0.20\%$
HX-EP-100	100 2.5 m	82.9 3.26	$\pm 0.20\%$
ALL RANGES GREATER THAN 100'	100 2.5 m	82.9 3.26	$\pm 0.20\%$

1. The resolution shown is a calculated number based upon the capstan diameter, wire rope diameter and line count of the encoding device. The tolerance on the resolution accounts for resolutinal differences from unit to unit due to manufacturing tolerances on the capstan and wire rope. In practice, the output count in a given unit of travel is an integer.

## Technische Daten

# HX-V SERIES

 UniMeasure

## VELOCITY OUTPUT

The UniMeasure HX-V series linear velocity transducer incorporates a self-generating tachometer which eliminates the need for any external power supply. Extra long brush life, excellent stability and a wide operating temperature range make the V series transducer highly reliable for long term service.

## OPTIONS

OPTION	OPTION DESIGNATOR	DESCRIPTION																												
Nylon jacketed wire rope (Ranges to 80")	NJC	Replaces standard stainless steel wire rope with Ø.018 nylon jacketed wire rope. This option increases wire rope life dramatically but may increase non-linearity by as much as ±.05% of full scale.																												
Nylon jacketed wire rope (Ranges 100" to 400" only)	NJC037	Replaces standard stainless steel wire rope with Ø.037 nylon jacketed wire rope.																												
Reversed output	R	Output is at a maximum when wire rope is fully retracted. Output decreases as wire rope is extended. Does not apply to velocity signal.																												
NEMA 6, IP-68 capability	N6	 Connector is replaced with a bulkhead fitting and 8' (2.4 m) of urethane jacketed, shielded, twisted pair cable. Retraction mechanism and electrical components are sealed to NEMA 6, IP-68 capability.																												
Stainless steel construction (Ranges to 80" only)	SS	 All anodized aluminum parts on transducer housing are replaced with stainless steel. Transducer is sealed to NEMA 6, IP-68 capability. Eight feet (2.4 m) of urethane jacketed, shielded, twisted pair cable exits unit. No connector.																												
Non-standard potentiometer (Applies to HX-PA only)	PXK	Replace "X" in option designator with required potentiometer value in K ohms. Non-standard potentiometer linearity is as follows: Ranges 0 to 2" to 0 to 5" ..... ±1.00% of full scale Ranges 0 to 10" to 0 to 25" ..... ±0.50% of full scale Ranges 30" and above ..... ±0.25% of full scale Note: This option is subject to potentiometer availability.																												
Alternate wire rope exit Measurement ranges to 80" (2.0 m)	E1, E2, E3 Specify from orientation shown.	 <table border="1"> <thead> <tr> <th>RANGE</th> <th>"A"</th> <th>"B"</th> <th>"C"</th> </tr> </thead> <tbody> <tr> <td>2", 10"</td> <td>1.12(28.4)</td> <td>1.79(45.5)</td> <td>1.21(30.7)</td> </tr> <tr> <td>3", 15", 30"</td> <td>.96(24.4)</td> <td>1.95(49.5)</td> <td>1.37(34.8)</td> </tr> <tr> <td>4", 20", 40"</td> <td>.80(20.3)</td> <td>2.11(53.6)</td> <td>1.53(38.9)</td> </tr> <tr> <td>5", 25", 50"</td> <td>.64(16.3)</td> <td>2.27(57.7)</td> <td>1.69(42.9)</td> </tr> <tr> <td>60"</td> <td>.49(12.4)</td> <td>2.42(61.5)</td> <td>1.84(46.7)</td> </tr> <tr> <td>80"</td> <td>.25(6.4)</td> <td>2.66(67.6)</td> <td>2.08(52.8)</td> </tr> </tbody> </table> <p>Dimensions in brackets are millimeters.</p>	RANGE	"A"	"B"	"C"	2", 10"	1.12(28.4)	1.79(45.5)	1.21(30.7)	3", 15", 30"	.96(24.4)	1.95(49.5)	1.37(34.8)	4", 20", 40"	.80(20.3)	2.11(53.6)	1.53(38.9)	5", 25", 50"	.64(16.3)	2.27(57.7)	1.69(42.9)	60"	.49(12.4)	2.42(61.5)	1.84(46.7)	80"	.25(6.4)	2.66(67.6)	2.08(52.8)
